DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-35 are rejected under 35 U.S.C. 102(b) as being anticipated by Elliott et al. (US PAT # 6,614,781).

Regarding claims 1-2, Elliot teaches a gateway (reads on GTW 110, Fig. 1) for conveying a telephone call to a packet switched data network, the gateway comprising a first interface (402, Fig. 4A and corresponding text) for receiving out of band telephone signals from a telephone network, a second interface (such as interface 406, Fig. 4A and corresponding text) for transmitting said out of band telephony signals over said data network to a second gateway (108, Fig. 1) to facilitate call setup.

Claims 4-5, 7-12, 14-15, 17-18, 20-23, 29 and 34-35 are rejected for the same reasons as discussed above with respect to claims 1-2. The claimed "software" as recited in claim 7 reads on soft switch (204) which is considered an application software program running on a computer. See Figs. 4B-4E.

Claims 3, 6, 13, 19, 24 and 30 recite "said out of band signals are SS7 protocol signals" (see col. 4, lines 30-49).

Claim 16 recites "wherein said out of band telephony protocol signaling is SS7 or C7 signaling and said separate call setup protocol is H.323 (see Fig. 58A and corresponding text).

Claims 28, 31 and 33 are rejected for the same reasons as discussed above with respect to claim 16.

For claim 25, which teaches the use of sending IAM (Initial Address Message) see (Fig. 28 and corresponding text.)

For claims 26-27 and 32 that recite the use of ACM (Answer Complete Message) see Fig. 36 and corresponding text.
